Claims 1-30 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art of record is Goodson et al. Goodson et al teach a transmitter which has a clock circuit (64), infrared transmitter (88) which produces a burst of a predetermined number of pulses during a predetermined time period (column 5, line 67-column 6, line 2) and counter (62); a receiver which has a microcontroller (108) , a clock controller (110) which is synchronized with the transmitting clock (column 9, lines 3-12). Goodson et al do not teach nor render obvious a microcomputer at the receiver which renders the receiver effective a predetermined time period before each burst from the transmitter, counting each time that the beam of bursts of at least the predetermined minimum number of the pulses is interrupted and ceasing to cycle for a predetermined period of time when the receiver does not receive one of the bursts for a predetermined number of cycles of operation of the microcomputer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
